Mexican Boy

Artikel info:-

While Lukas was working on his boxing techniques Karlos (18) entered the room. Karlos got excited on the things that were happening at Fightplace. So he wanted to know more. Lukas was annoyed and so the Newbie had to feel that. He always showed his well trained body and presented his big muscles. Seems like he felt better than any other one. Karlos is not that delighted with Lukas's ego and just thought: "What does this idiot want from me? He is about one foot smaller than me. If we're getting in trouble, I can easily beat the hell out of him." Lukas is a very good boxer, but then we discovered that Karlos is able to do this, too. But is Karlos able to wrestle? Both of them want to find that out in the basement. Is the size everything or could Lukas win this fight with all of his experience? Both of them are Street-Fighters. You can notice that, because of they always began their rounds with hot Box Sessions until they continued with the true fight. When they fall down the ground, the wheat separated from the chaff. We noticed immediately who dominated this fight. Lukas is the more experienced fighter, who is able to restrict Karlos with his painful Scissors and SchoolBoyPins. He had to learn these moves of wrestling first. Lukas enjoyed his advantage. He always posed to present his big muscles while he sat on him. This is why Lukas is just the better juggler with more technique. So Karlos has to confrontate both Scissors, Pins and Bitchslaps and has to learn what a true Wedgie are. Sometimes he was able to turn that fight, so we're able to notice that he is able to show more. For sure we don't know if Karlos would fight until this day, to learn more moves and tricks. We will wait for this day, because Lukas would not have a fight which proceeds like this one. Against the Mexican Boy.
